*** Very highly significant difference ($p < 0,01$).

Source: INEI - National Household Survey, 2007-2017.

Peru: Average Monthly Actual Expenses Per Capita, by quintiles, in 2016 – 2017

(Constant base soles = 2017 at prices of Metropolitan Lima)

Percentage change

National

- 0,2

* Significant difference ($p < 0,10$).

** Highly significant difference ($p < 0,05$).

*** Very highly significant difference ($p < 0,01$).

Source: INEI - National Household Survey, 2016-2017.

EVOLUTION OF ACTUAL INCOME

Peru: Evolution of Average Monthly Actual Income Per Capita: 2007 – 2017

(Constant base soles = 2017 at prices of Metropolitan Lima)

* Significant difference ($p < 0,10$).

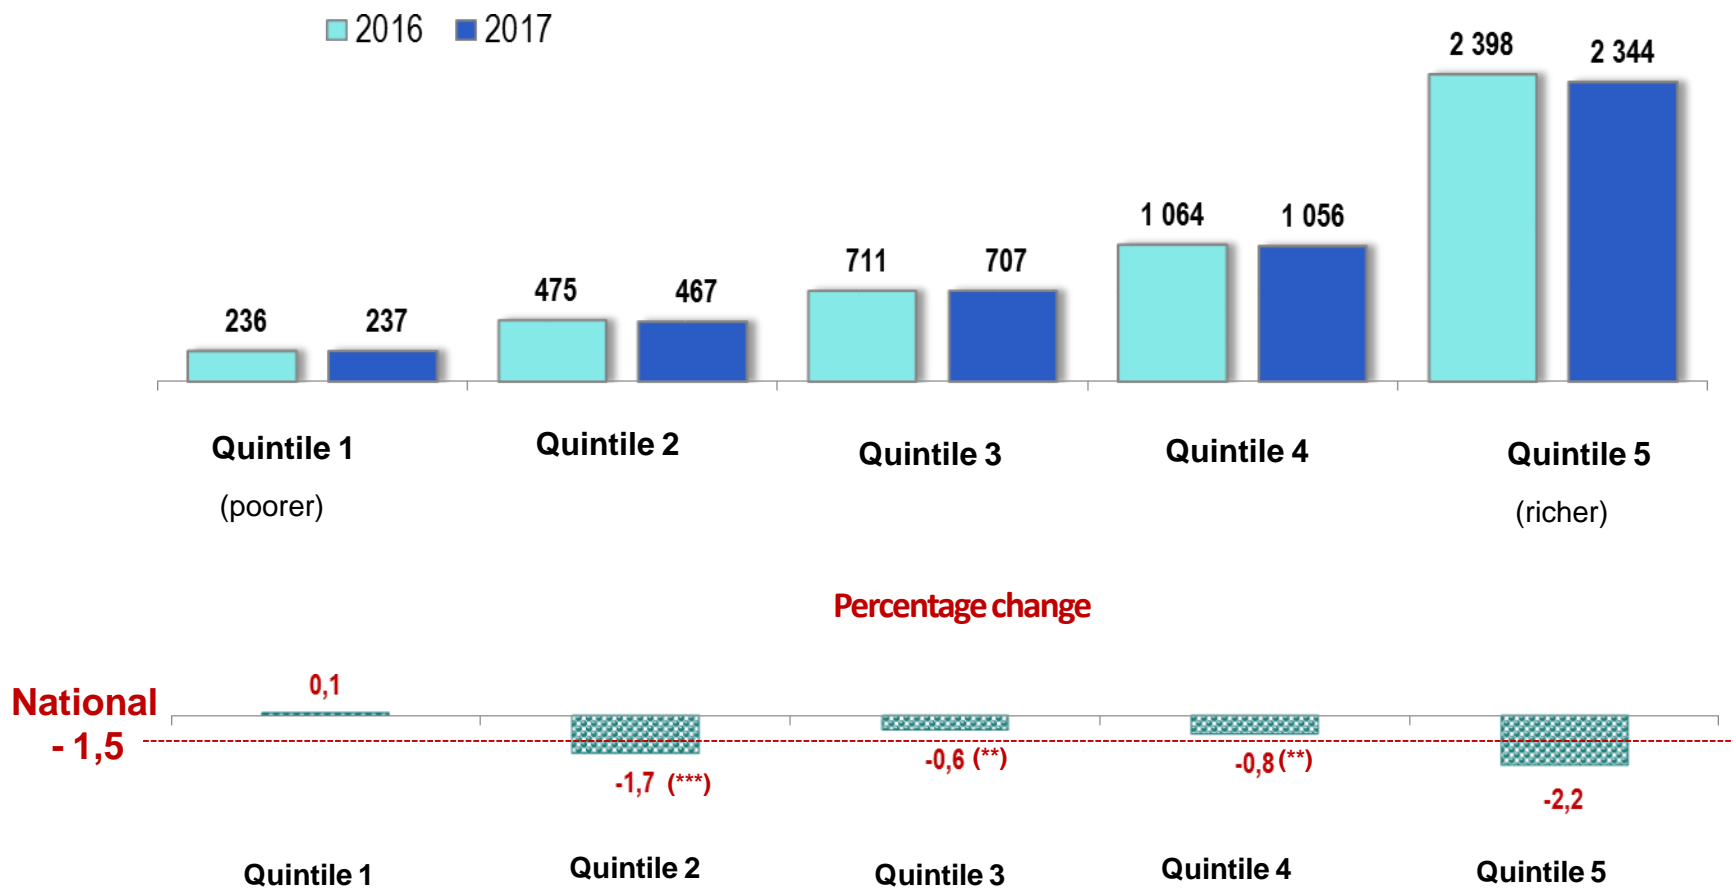

** Highly significant difference ($p < 0,05$).

*** Very highly significant difference ($p < 0,01$).

Source: INEI - National Household Survey, 2007-2017.

Peru: Average Monthly Actual Income Per Capita, by quintiles: 2016 – 2017

(Constant base soles = 2017 at prices of Metropolitan Lima)

* Significant difference ($p < 0,10$).

** Highly significant difference ($p < 0,05$).

*** Very highly significant difference ($p < 0,01$).

Source: INEI - National Household Survey, 2016-2017.

Peru: Evolution of the Gini Coefficient of Income: 2007-2017

Source: INEI - National Household Survey, 2007 – 2017.

The GINI coefficient is an indicator normally used to measure inequality in a country. This measurement varies on a scale from "0 to 1", where "0" (zero) expresses total equality and "1" (one) the maximum inequality.
